DETAILED ACTION

This office correspondence is response to the applicant's amendment filed on Feb 10, 2009.

Claim 1 – 62 are pending.

REASONS FOR ALLOWANCE

The following is the examiner's statement of reasons for allowance:

There is no teaching or suggestion in the prior art of the combination of claim limitations, among other things, as presented in claim 1, specifically that determining that an IM includes content to be added to a web log and to access the data that records the associating between the web logs and corresponding user identifiers that are associated with web log, and comparing a user identifier corresponding to the IM sender to at least some of the user identifiers within the accessed data, and based on the results of the comparing identifying a web log as being associated with the IM sender, adding the content included in the IM to the web log identified as being associated with the IM user.

This is found in Applicant's specification on page 3, lines 17 - 21.

The closest prior art found by the Examiner is the previously cited Kay et al. in view of Kegel et al. wherein Kay et al. teaches a method and system for interactively responding to requests sent as instant messages from a user, When the message server receives an IM message from a user, the message is processed to determine the type of request made by the user and the appropriate actions necessary to service the

Art Unit: 2446

request, the Kay reference does not teach or suggest determining that an IM includes content to be added to a web log and to access the data that records the associating between the web logs and corresponding user identifiers that are associated with web log, and comparing a user identifier corresponding to the IM sender to at least some of the user identifiers within the accessed data, and based on the results of the comparing identifying a web log as being associated with the IM sender, adding the content included in the IM to the web log identified as being associated with the IM user as claimed by Applicant. For these reasons, in conjunction with the other claim limitations puts this case in condition for allowance.
